

Butterfly

The Butterfly Buffet

What is more beautiful and seemingly effortless than the flight of a  ? Perhaps only a garden in full flower. Our gardens are a continual source of pleasant discovery, a feast for the senses, and an oasis for the soul.

But gardeners know better than anyone that the garden you enjoy at ease is the result of constant work. Why do we do it? Because we love the results, both in the garden and in ourselves.

The  works hard in their brief lives and amaze us with their vivid colors and patterns. We do what we can to encourage and support them. Meanwhile they are pollinating the fruits and flowering plants that depend on them for their own reproduction, and we depend on for our own existence.

Our  buffet this year is designed to attract with color and fragrance, nectar and an array of water sources. The numbered plants include the Japanese snowbell tree, Baptisia American Goldfinch indigo, Jasmine vine, butterfly bush, yarrow, salvia, scabiosa pincushion flower, bitterroot, milkweed candy and tuberosa, lantana, green fennel, marigold, zinnias and more.

We hope you enjoy the floral buffet as much as our  friends do! Bon appetit!

Plant descriptions

1. *Japanese Snowbell tree*
2. *Baptisia/American Goldfinch*
3. *Jasmine Vine/Margarita*
