15. *Monarda fistulosa* (Wild Bergamot)
16. *Symphotrichum novae-angliae* (New England Aster)
17. *Echinacea purpurea* (Pink Coneflower)

#### SHRUB

18. *Buddleia* 'Queen of Hearts' (Queen of Hearts Butterfly Bush)

## Junior League of Detroit Gardeners

### 2024 Trial Garden Plot 8

#### A BUTTERFLY GARDEN

The garden was designed to provide a combination of herb, annuals, perennials, and a shrub that would attract butterflies, (and perhaps some additional beneficial insects, moths, birds (especially hummingbirds)). By planting a diversity of colorful and nectar rich flowers, we are providing a habitat sanctuary in which butterflies can feed, breed, thrive, and have a place to rest and drink. The visit by butterflies and other pollinators help to pollinate other plants in our garden. We can observe the butterfly's graceful flight, vivid colors and patterns. Butterflies who visit not only our plot, but also the other plots, provide a peace, calm, and a tranquility for our well-being.
